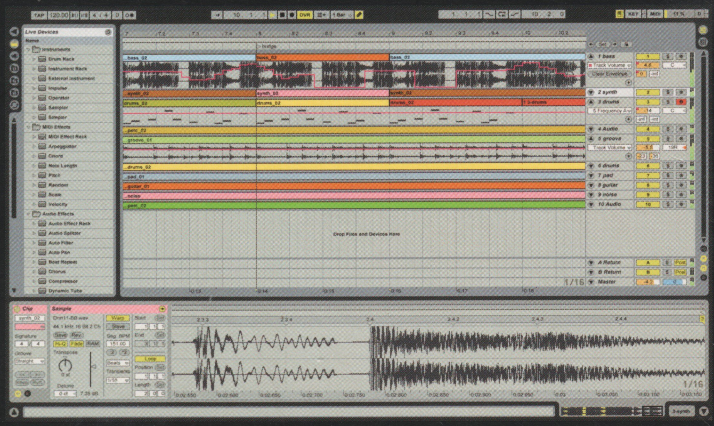
Ableton Suite combines the award-winning Ableton Live with Ableton instruments in a comprehensive bundle at a great discount.

Ableton Live 7 Music creation, production and performance for Mac OS and Windows.

Live's unique **Session View** acts as a powerful musical sketch and launch pad, allowing you to try out new ideas easily and improvise freely. Each cell in the Session View grid can hold a recording, MIDI file or any other musical idea. These ideas can be recorded on the fly or dragged in from the Browser and played in any order and at any time you wish.



The **Arrangement View** offers a timeline-based approach for traditional multitrack recording, MIDI sequencing and other music production tasks. You can even improvise in the Session View, and all of your actions will be recorded into the Arrangement View, where they can be edited whenever you like.
